

Remarks

Applicant wishes to thank the Examiner for the consideration given to the application. While Applicant is disappointed in the presentation of a new basis for rejections of the previously presented claims after the Examiner indicated prospective allowability on page 3 of the prior office action, Applicant has added additional limitations it believes avoids the newly cited reference to White, U.S. Pat. 1,100,804. Claims 16 and 26 have been altered to rectify the objections raised by the Examiner as to firm, but claim 11 has not been amended. Applicant believes the form of the word “panels” is grammatically correct as referring to both the roof and front panels, as recited, and asks the Examiner to reconsider this objection. Claims 3-12, 14-24, and 26 have been amended as shown in the listing of claims. Claims 1 and 2 remain cancelled, but two new claims 27 and 28 have been added to take their place. Claim 25 remains unchanged and claim 13 was previously presented and was not amended in this paper.

Based upon the changes made to the claims, Applicant submits that nothing in either of the cited references teaches or suggests each and every element in each claim, nor do the cited references either taken singly or in combination render any claims obvious. Applicant respectfully requests reconsideration and withdrawal of the cited rejections based upon the revised form of the claims.

Conclusion

Applicant submits that all of the claims of the present application are in condition of allowance and requests the Examiner reconsider and withdraw all prior rejections and objections and issue a notice of allowance. However, if the Examiner discovers any

remaining issues, Applicant requests that the Examiner contact the undersigned via telephone to rapidly resolve those issues. No fees are required for this response.

Respectfully submitted,

SIROTE & PERMUTT, P.C.
